

BIOS Update Instruction for the Vig740M Motherboard PMPMS740- Vig740M

- Before initiating a BIOS update, be sure to read and precisely follow the instructions included in this document.
- If a BIOS update process is interrupted or the incorrect BIOS is flashed, your system may not function properly and can possibly damage the motherboard.
- Before updating the BIOS on the Viglen Desktop Board, manually record all BIOS settings that have been changed (from default) so they can be restored after completing the BIOS update

There are up three methods of updating BIOS to the latest Viglen approved version. The number of options made available for any particular board may vary depending on BIOS Support, drive support and BIOS update file size. You only need to use one.

- M-Flash Update
- Windows Update

BIOS Update Instructions using M-Flash Method:

For this method you will require a Flash USB device and required BIOS file.

- This function supports USB flash disks formatted using FAT32/16 on a single partition only.
- Ensure BIOS file is copied onto root of the USB media.
- 1. Save BIOS update zipped file to a temporary directory.
- 2. Extract the BIOS file.
- 3. Copy the BIOS file to a USB device (make sure the BIOS file is on the root directory of the flash drive)
- 4. Boot the target PC with the device connected or inserted.
- 5. Press the **<F11>** key during POST checks for Boot Menu and select **<Enter Setup>** option
- 6. Select M-Flash from the BIOS setup menu.

IMPORTANT!!!!!

During the update process DO NOT shut down the PC or interrupt the process, this could cause damage to the motherboard.

Windows\WinPE BIOS Update

Windows

- 1. Save the BIOS update file to a temporary directory.
- 2. Extract necessary files.
- 3. Open Commend Prompt
 - a. Type 'CMD' under Search.
 - b. Run Commend Prompt as Administrator
- In commend prompt navigate to the extracted BIOS file. (i.e. E7788IV1_325_32Bit for Windows 32Bit)

5. At the prompt, type **flash.bat** to launch the BIOS updates process and Press any key to continue.

6. BIOS update process will start.

CAUTION!!! DO NOT POWER DOWN YOUR SYSTEM before the update is complete.

Note: During BIOS update process keyboard and Mouse will not respond.

7. Once BIOS update is completed, system will re-start.
